COLEGIUL TEHNIC  
„ION HOLBAN” IAȘI

**Project no.**

**2021-1-RO01-KA121-VET-000012711**

**„SPECIALST FOR FUTURE”**

Within the Erasmus + 2021-1-RO01-KA121-VET-0000127711 project, a group of 11th-grade students of the “Ion Holban” Technical College achieved PowerPoint presentations and posters using the Canva platform and focusing on the topic of recycling. The aim of this activity was informing our 9th-grade students with respect to the selective collection, according to the “three R” rule: reducing, re-using, and recycling waste products.

Afterwards, the 11th- and 9th-grade students took part in an activity focused on reducing, re-using, and recycling waste products. They made use of the materials achieved on January, the 18th, 2023: Power Point presentations and Canva posters.

This activity was followed by the 9th grade students' debate on good practices of selective collecting waste products. To make this activity more appealing, each participant had the chance to come up with his/her feedback on the Kahoot platform.
